ALICE PECK DAY MEMORIAL HOSPITAL SELECTS BIZTECH HEALTHCARE SOLUTIONS, INC.'S PROMED DM DOCUMENT MANAGEMENT SOLUTION

Piscataway, NJ, January 28, 2010: BizTech Healthcare Solutions, Inc. (www.forbiztechhealth.com), an award-winning provider of innovative business process solutions for healthcare, and Microsoft Gold Certified ISV Managed Partner, has been chosen by Alice Peck Day Memorial Hospital (www.alicepeckday.org) for its ProMed DM document management system which integrates with the hospital's existing Meditech HCIS.

Alice Peck Day Memorial Hospital is located in Lebanon, NH, and provides primary care, independent and assisted living, and specialty services to over 20 communities in New Hampshire and Vermont. The hospital will be using ProMed Scanning and ProMed DM for patient chart scanning, providing their staff with direct access to stored images and data from the hospital's Meditech HCIS system. The solution will be implemented in a SaaS model for Alice Peck Day Memorial Hospital. BizTech offers its solutions in both a SaaS and traditional software server model.

"I know firsthand what it's like being totally out of space, having to adequately secure records and provide timely access to multiple users for patient care. The cost of storing paper records is not insignificant when you add up the supplies, labor, and the opportunity cost associated with taking up space that could be put to better revenue-producing uses. With this product we are able to directly access documents from Meditech without having to re-enter patient identification. From a user, meaningful use, and bottom-line perspective, this product meets our requirements."

~ Lea Bruch, MBA, RHIA

Director of Health Information Management & Privacy Officer
Alice Peck Day Memorial Hospital

ProMed DM utilizes non-proprietary databases from Microsoft, Oracle, or IBM to provide a feature-rich and IS Department-friendly document management system that is designed to support hospital-wide scanning, document and content management along with workflow. ProMed DM users can access stored images and data directly from host systems such as Meditech, QuadraMed, IntraNexus, etc. using the ProMed Enabler. With the ProMed Enabler, users are only one click away from seeing all scanned images and related data from any other line-of-business application.

BizTech Healthcare Solutions, Inc. offers its ProMed Series of Revenue Cycle Management Solutions throughout the U.S. and the Caribbean. This award-winning application suite reduces operating costs and increases cash flow and compliance. Solutions include: Patient Chart Scanning, Automated HIM Charge Entry & Coding, Chart Management, Verbal Orders, Release of Information, Patient Registration Scanning with Secure ID, EOB Scanning Solutions, AP processing, HR workflow and Enterprise Content Management & Workflow. The Company also provides imaging hardware components and service contracts. Visit www.forbiztechhealth.com
